

AVIATOR™ FLY BAIT AEROSOL: FLY CONTROL THAT GOES ABOVE AND BEYOND

REACH THE UNREACHABLE WITH AVIATOR™

Aviator™ Fly Bait Aerosol is the ultimate solution for effective fly control. With a simple spray that targets hard-to-reach places, like walls and surfaces around ag operations and rural settings, it excels at controlling house flies where traditional baits can't reach.

EFFECTIVE FLY CONTROL IS A SPRAY AWAY

Aviator™ Fly Bait Aerosol serves as your go-to solution for fly control. With a simple spray, you can tackle house flies in hard-to-reach places, including walls and surfaces around your operation. This innovative solution excels in controlling house flies in situations where traditional scatter baits can't reach, providing your operation fly control from top to bottom. Its versatility makes it perfect for deployment inside pig barns, chicken coops, poultry houses, horse stables, and cattle and dairy barns.

As a valuable addition to the Starbar® family, this aerosol fly bait introduces another effective tool for fly control. By providing multi-level fly control, Aviator™ Fly Bait Aerosol becomes an indispensable solution helping to ensure a clean and productive environment on your operation.

FEATURES:

- The active ingredients Acetamiprid and Z-9 tricosene
- Convenient 16 oz. can

BENEFITS:

- KILLS: house flies, lesser house flies, fruit flies, dark-eyed fruit flies, and vinegar flies
- Works up to 30 days on non-porous surfaces when protected from direct sunlight and rain
- No odor
- Convenient spray
- Compatible with IPM programs
- Fly control at multiple levels

APPLICATION METHOD:

- Aerosol Fly Bait

APPLICATION AREAS:

- Pig barns
- Chicken coops
- Poultry houses
- Horse stables
- Dairy barns

APPLICATION INSTRUCTIONS:

Do not apply to surfaces that may reach excessive temperatures. Examples include heaters, boilers, hot water pipes, lighting, motors and engines, and machinery. Do not apply to electronic equipment or other areas where electrical short circuit could occur. Do not apply to food or feed handling or storage surfaces. Do not apply directly to animals, or to areas where animals may contact sprayed bait. For all application sites, keep treatments out of the reach of children, pets, and other animals.

BAND/SPOT TREATMENTS:

Band/Spot treatments may be made to narrow areas out of reach of animals, such as fence or support poles, beams, ledges, door jambs, around windows and window frames, along foundations or low on walls, walkways in caged layer houses, and other areas where flies land or roost.

Reapply when bait placements are no longer visible and/or re-infestation occurs, but no more than 10 times per year. For residual control of up to 30 days, product should be applied to non-porous surfaces protected from rain and direct sunlight.
