# The Right Level of Fly Control

Correct Placement Makes the Difference

## CEILING, ATTICS AND RAFTERS

- Flies rest up high
- Bright colors entice flies to land
- Hang in livestock areas above their reach

Sticky Traps

## WALLS, FENCES AND CORRALS

- Pheromones and feeding stimulants lure flies to traps
- Hang along fence lines, calf hutches, sheds and more to attract flies

Odor and Pheromone Traps

## FLOORS, LEDGES, GATES AND OFF THE GROUND

- Flies feed at low levels
- Sugar base and attractants encourage flies to feed
- Scatter on the ground or hang outside of livestock's reach

Scatter Baits, Strips and Traps

## CATTLE, PASTURE, CROPS, STANDING WATER AND STRUCTURES

- Multiple premise control options that can be used throughout an operation to fight a variety of insects

Animal and Perimeter Treatments

## Sticky Traps

### CEILING - ATTICS - RAFTERS

After feeding, flies have a tendency to rest up high in the cooler regions of barns, stables and other outbuildings. Starbar® products have a lineup of sticky traps designed to trap flies in the areas where most other control methods fail to reach. These sticky traps have bright colors that entice flies to land, and they function without any chemicals or odor. Just hang Starbar® sticky traps out of reach of people and livestock, and start capturing flies.

- The joists that support arched ceilings are strategic locations for the placement of sticky traps.
- On flat and angled ceilings, the rafters can be used to hang traps to capture flies in the areas where they land.

HIGH

### EZ TRAP® FLY TRAP

EZ Trap® Fly Trap has a unique, compact design, which offers a large trapping surface in a compact trap that can be used indoors and outdoors with no harmful chemicals. EZ Trap® Fly Trap is insecticide and odor free. It can be hung up or placed on surfaces throughout any operation where flies are most active.

| 3004323 | Adhesive Fly Trap (2-pack) | 12        |

### FLY STIK™ STICKY FLY TRAPS

Available in two sizes, the 12-inch Fly Stik™ Jr. Sticky Fly Trap and the 24-inch Fly Stik™ Sticky Fly Trap sticks are insecticide and odor free. Both sizes come in a bright orange color to attract flies. The slim stick design makes Fly Stik™ Sticky Fly Traps convenient to hang inside and outside barns, homes and stables.

## Odor and Pheromone Traps

### WALLS - FENCES - CORRALS

Flies mate higher than feeding level but lower than resting level. The pheromones and feeding stimulants in Starbar® traps lure flies looking to mate in between feeding and resting. These traps are available in a variety of sizes and are designed to fit your needs. Hang Starbar® traps along fence lines, near calf hutches, on walls and in other areas.

- Hanging odor and pheromone traps along fence lines will lure irritating flies away from livestock.
- Short walls and shelves in barns, stables and outbuildings are ideal areas for trap placement.

MEDIUM

### CAPTIVATOR® FLY TRAP

A heavy-duty, reusable 2 qt. plastic jug trap that is durable and easy to use, Captivator® Fly Trap is economically priced and comes complete with a 30 gm. water soluble attractant pouch.

## Scatter Baits, Strips and Traps

### FLOORS - LEDGES - GATES - OFF THE GROUND

Flies feed at a low level; that's why our scatter baits and strips use a sugar base in combination with various attractants to encourage flies to feed. Starbar® scatter baits and strips are adulticides that must be placed out of reach of livestock, pets and humans. They can all be used in a rotation to discourage fly resistance. Our off-the-ground sticky trap attracts stable flies using direct sunlight, drawing them away from feeding on cattle.

- Spread scatter baits along open floor space in areas that are out of reach for livestock, pets and humans.
- Biting flies rest in the tall grass close to their last blood meal, an ideal location for the Bite Free™ Stable Fly Trap placement.

LOW

## QUIKSTRIKE® FLY BAIT

With the active ingredient dinotefuran, QuikStrike® Fly Bait kills nuisance flies quickly and controls those resistant to carbamates and pyrethrin sprays. Its homogenous formulation contains (Z)-9-tricosene to attract flies and can be used as labeled where flies are a problem.

## INTRODUCING AVIATOR™ FLY BAIT AEROSOL

Aviator™ Fly Bait Aerosol is the ultimate solution for effective fly control. With a simple spray that targets hard-to-reach places, like walls and surfaces around ag operations and rural settings, it excels at controlling house flies where traditional baits can't reach. Its versatility makes it perfect for deployment inside pig barns, chicken coops, poultry houses, horse stables, and cattle and dairy barns.

## CYANAROX® INSECTICIDAL BAIT

Cyanarox® Insecticidal Bait, a ready-to-use granular bait to control house flies, contains the active ingredient cyantraniliprole. It is both highly attractive and highly effective in controlling house fly populations. Cyanarox® Insecticidal Bait can be used indoors in a bait station and outdoors in common areas where high fly densities are most apparent. Cyanarox® Insecticidal Bait can also be used in rotation with QuikStrike® Fly Bait, Golden Malrin® Fly Bait and DuraStrike® Fly Scatter Bait to form a formidable, four-pronged rotational approach to manage against resistance.

## BITE FREE™ STABLE FLY TRAP

Bite Free™ Stable Fly Traps are scientifically proven to help effectively trap flies that feed on your animals. When sunlight shines through, flies are drawn to the shimmering, translucent surface. Bite Free™ Stable Fly Traps have a weatherproof adhesive surface that won't melt or wash away. These traps are easy to use and work without insecticides or pungent attractants.

## QUIKSTRIKE® II FLY ABATEMENT STRIP

The QuikStrike® II Fly Abatement Strip contains a triple-action attractant and a unique active ingredient that kills flies minutes after they begin to feed. Flies feed low and rest up high. Simply place the device 4 ft. from the ground or lower, or in a bucket for ideal control. The QuikStrike® II Fly Abatement Strip can be used throughout any operation (including milking parlors) where flies are a problem.

| PROD. #   | PROD. DESC.              | CASE QTY. |

INSECTS USED TO LIVE HERE

### Animal and Perimeter Treatments

CATTLE - PASTURE - CROPS - STANDING WATER - STRUCTURES

Starbar® products offer multiple premise control options that can be used throughout an operation to fight a variety of insects. We have solutions for flies that can go on cattle and crops, as well as around barns, stables and outbuildings. There are baits to fight fire ants in pastures and around the property. There's also mosquito control in standing water and around the backyard.

IN, ON AND AROUND

- ClariFly® Add-Pack Fly Control for calves is a feed through that can go into milk and milk replacer for fly control.
- Help prevent mosquito larvae from developing into breeding, biting adults by dropping Pre-Strike® Mosquito Torpedo® larvicide into standing water.
- Extinguish® Plus fire ant bait can be used in pastures and yards to rid your land of fire ants and their painful stings.

## PYRONYL™ CROP SPRAY

A broad-spectrum insecticide for use in dairy, livestock and poultry operations, Pyronyl™ Crop Spray is an insecticide formulated for surface spraying, misting systems and on-animal uses. The active ingredients in Pyronyl™ Crop Spray offer dual modes of action with pyrethrins as a sodium channel inhibitor and PBO as a cytochrome enzyme blocker.

| PROD. #   | PROD. DESC.   | CASE QTY. |
|-----------|---------------|-----------|
| 100542216 | 1 qt. bottle  | 6         |

| 100208916 | 55 gal. drum  | 1         |

## PBO-8® SYNERGIST

A synergist for many classes of insecticides, PBO-8® Synergist improves efficacy, allowing lower use rates and preventing resistance. It works by blocking the production of mixed-function oxidase enzymes, which insects use to metabolize an insecticide's active ingredients.

| PROD. #   | PROD. DESC.   | CASE QTY. |
|-----------|---------------|-----------|
| 100208975 | 1 gal. bottle | 4         |

## STARBAR® E-PRO ADULTICIDE SPRAY

Formulated for residual pest control, Starbar® E-Pro Adulticide Spray is an insecticide that can be applied in and on buildings, structures and their immediate surroundings. The versatile label applications of Starbar® E-Pro Adulticide Spray include use as a livestock spray.

| PROD. #   | PROD. DESC.      | CASE QTY. |
|-----------|------------------|-----------|
| 100209011 | 1.25 gal. bottle | 4         |

## LAMBDA 9.7 CS

Lambda 9.7 CS is an adulticide labeled for control of a variety of insects as well as being approved for a wide range of application sites. Advanced protection technology prevents the active ingredient from breakdown in heat and UV exposure, resulting in greater residual control and reduced retreatments.

| PROD. #   | PROD. DESC.  | CASE QTY. |
|-----------|--------------|-----------|
| 100208957 | 1 qt. bottle | 6         |

## CATTLE ARMOR™ 1% SYNERGIZED POUR ON

Cattle Armor™ 1% Synergized Pour On can be used as a pour on, mist spray or in a backrubber for livestock insect control. Its synergized formulation controls lice and flies on beef cattle, lactating and non-lactating dairy cattle, and calves, and lice on sheep.

| PROD. #   | PROD. DESC.   | CASE QTY. |
|-----------|---------------|-----------|
| 100209003 | 1 gal. bottle | 4         |

## **PROLATE/LINTOX-HD™ INSECTICIDAL SPRAY & BACKRUBBER FOR LIVESTOCK**

Diluted and used as a spray or in a backrubber, the powerful active ingredient in Prolate/Lintox-HD™ Insecticidal Spray & Backrubber for Livestock kills a variety of listed insects. It can be used for treatment of horn flies on non-lactating cattle or for lice and sarcoptic mange mites on swine. It also controls ticks.

| PROD. # | PROD. DESC.   | CASE QTY. |
|---------|---------------|-----------|
| 64580D  | 1 qt. bottle  | 6         |
| 61200C  | 1 gal. bottle | 4         |

## **PRE-STRIKE® MOSQUITO TORPEDO®**

Stop mosquitoes before they start. The insect growth regulator (IGR) in Pre-Strike® Mosquito Torpedo® larvicide helps prevent mosquito larvae from developing into breeding, biting, disease-carrying adults. Each torpedo, when dropped into standing water around rural properties, can provide up to 60 days of protection.

| PROD. #   | PROD. DESC. | CASE QTY. |
|-----------|-------------|-----------|
| 100546950 | 3 pack      | 12        |

## CLARIFLY® ADD-PACK FLY CONTROL

Over 96% effective at ending fly life cycles at the larval stage.\* Help stop irritating, disease-spreading flies with the daily addition of ClariFly® Add-Pack Fly Control for calves to your whole milk or milk replacer. It contains a larvicide that works as a feed through, passing into calf manure where flies lay their eggs. It's fly control that starts with your calves to benefit your whole operation. Use ClariFly® Add-Pack Fly Control for calves in whole milk or milk replacer as part of an integrated pest management (IPM) program to help reduce fly populations in calf environments.

## ON THE RIGHT LEVEL

---

Insect control starts with Starbar® products. Over the years, the Starbar® lineup has grown to feature additional products that can do more to fight flies, fire ants, mosquitoes, cockroaches, ticks, lice and other parasitic pests that can affect your operation. Visit our website at [StarbarProducts.com](http://StarbarProducts.com) to find the right solution for your operation.

## Helping You Set the Bar at Every Level

Insect control starts with Starbar® brands. With products scientifically tailored to insect behavior at pinpoint locations, Starbar® products have delivered reliable results that have been trusted for more than 40 years. Whether it's flies resting up high in a barn, fire ants foraging low on the ground, or mosquitoes flying around your operation, Starbar® products have a solution for every level to make your life easier. When you use Starbar® products, you set the bar for insect control.
