THAT CAN STOP FLIES

CLARIFLY® ADD-PACK: FOR USE WITH WHOLE MILK OR MILK REPLACER

Help stop irritating, disease-spreading flies with the daily addition of ClariFly® Add-Pack to your calves' whole milk or milk replacer. ClariFly® Add-Pack is a larvicide that works as a feed through, passing into calf manure where flies lay their eggs. It's fly control that starts with your calves to benefit your whole operation.

Milk the most OUT OF FLY CONTROL with ClariFly® Add-Pack

Help control the house flies, face flies, stable flies, and horn flies that develop in calf manure. Use ClariFly® Add-Pack in whole milk or milk replacer as part of an Integrated Pest Management (IPM) program to help reduce fly populations in calf environments.

Features

- The active ingredient, Diflubenzuron, is considered by the EPA to pose a low risk:
 - to human health
 - to non-target organisms (birds, fish, plants)
- For use with either whole milk or reconstituted milk replacer
- Interrupts the fly's life cycle rather than through direct toxicity
- Compatibility with Integrated Pest Management (IPM) practices

Benefits

- Increased calf comfort
- Decreased spread of disease
- Healthier and more productive calves
- Better work environment

Application

Start ClariFly® Add-Pack early in the spring, ideally 30 days before flies begin to appear. Continue ClariFly® Add-Pack in the calves' whole milk or milk replacer throughout the summer and into the fall until cold weather restricts fly activity.

Dosage

Dosage should equal 1 tsp per 120 lbs of body weight per day or mix 0.1 oz of this product per 100 lbs of body weight per day. The bulk proportions for multiple calves are:

AVG. CALF WT. (LBS)	AMOUNT OF CLARIFLY® ADD-PACK PER DAY:					
	5 CALVES	10 CALVES	20 CALVES	40 CALVES	80 CALVES	100 CALVES
75	1 TBS	2 TBS	¼ C	½ C	1 C	1¼ C
100	4 tsp	8 tsp	⅓ C	⅔ C	1⅓ C	1⅔ C
150	2 TBS	¼ C	½ C	1 C	2 C	2½ C
200	8 tsp	⅓ C	⅔ C	1⅓ C	2⅔ C	3⅓ C

See label for complete directions for use
