

THREE REASONS INHIBIDOR™ IS BETTER THAN THE REST.

Larvicide, adulticide and synergist combine to protect cattle.

The new Starbar® Inhibidor™ Insecticidal Pour-On is a ready-to-use, triple action solution to defeat insects because we know good things come in threes. By killing listed parasitic flies and controlling lice, Inhibidor™ Insecticidal Pour-On can enable more efficient production through keeping your cattle comfortable, while protecting your bottom line.

STARBAR® INHIBIDOR™ INSECTICIDAL POUR-ON

Inhibidor™ Insecticidal Pour-On is approved to apply directly on cattle to provide control of chewing and sucking lice, and kills horn flies, horse flies, and deer flies. It protects your cattle from listed insect pests, allowing cattle to maximize their grazing and keep them comfortable, while also protecting your bottom line.

FEATURES:

- Active ingredients Diflubenzuron, Piperonyl Butoxide, and Lambda-cyhalothrin
- Combination of insect growth regulator, adulticide, and synergist
- 64 oz. treats 64 cattle (1,000 lbs. per animal)
- 2.5 gallons treats 320 cattle (1,000 lbs. per animal)

BENEFITS:

- Ready-to-use as a pour-on
- Helps control chewing and sucking lice, and kills horn flies, horse flies, and deer flies
- Can be used any time of year without risk of host-parasite reactions associated with grub treatment products
- May be used only for pour-on application to beef cattle and calves, indoors or outdoors
- Perfect complement to a comprehensive IPM program

APPLICATION METHODS:

POUR-ON

- Ready-to-use: No dilution necessary
- Application: Apply 0.1 fl. oz. (3 ml.) of Inhibidor™ per 100 lbs. body wt. of cattle. This is equivalent to 1 fl. oz. (30 ml.) per 1,000 lb. animal.
- Pour correct dose along back directly from tip and measure container, graduated applicator gun, or ladle/dipper

APPROVED FOR

- Beef cattle and calves

TARGET PESTS

- Chewing and sucking lice, horn flies, horse flies, deer flies
