ALL IN COCKROACH CONTROL

Precision baiting for hard-to-reach cracks and crevices

Starbar® Alluvium™ Cockroach Gel Bait is now available in a convenient 2.1 oz (60 g) tube for targeted application both indoors and outdoors. This concentrated gel formulation is highly attractive and palatable for extended cockroach control in small doses. Simply apply into cracks and crevices to stop cockroaches dead in their tracks. The gel adheres to vertical and horizontal surfaces with no oily residue.

Alluvium™ Cockroach Gel Bait is approved for use in poultry, cattle (dairy and beef), sheep, goat, equine and swine operations, as well as other commercial facilities. It should be applied out of reach of livestock.

Alluvium™ Cockroach Gel Bait is a gel matrix featuring the active ingredient Emamectin benzoate, which controls cockroaches by causing continuous flow of chloride ions to ensure rapid, dependable control. It controls cockroach pest species such as German cockroaches and American cockroaches.

REASONS TO USE ALLUVIUM™ COCKROACH GEL BAIT:

Effective

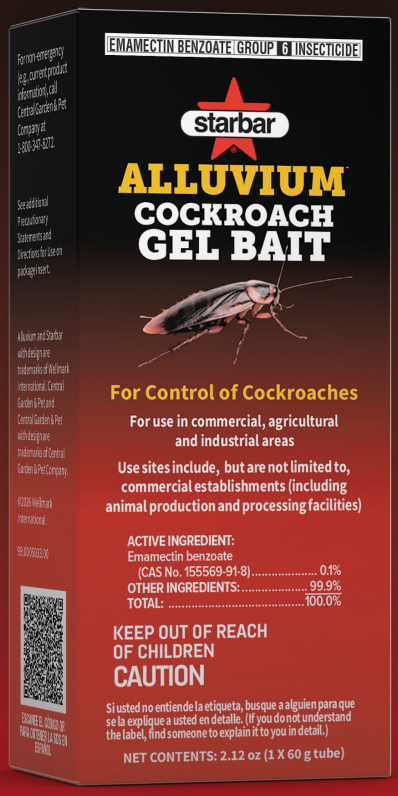

- Over 90% effective* and highly attractive and palatable for extended roach control

Convenient

- Easy to use and apply
- Can be used in conjunction with a non-repellent insecticide or with an insect growth regulator
- Heavy infestation areas only require 2-4 spots per nine square feet of treatment area

Versatile

- Adheres to vertical and horizontal surfaces
- Leaves no oily residue
- Can be used in bait stations
- Ideal for indoor and outdoor use
- Extensive list of approved use locations
- Ideal size – 2.1 oz (60 grams)

HOW TO USE

Use as a crack-and-crevice treatment applied out of the reach of animals and into openings leading to voids, and in bait stations for the indoor and outdoor control of cockroaches in animal housing facilities such as, but not limited to:

- Poultry houses
- Cattle
- Sheep
- Swine, goat and dairy facilities
- Horse stables
- Dog kennels
- Pet shops
- Zoos

Alluvium™ Cockroach Gel Bait is available in a 16-box display ideal for shelves or counters and built for maximum floor versatility to capture buys in main aisles, on endcaps, or at cash wraps. Each box offers a 2.1 oz tube for a convenient, easy-to-use application.

APPLICATION INSTRUCTIONS

Light infestations	Heavy infestations and control of larger cockroaches
1-2 spots are recommended per one sq yd (9 sq ft) of treatment area.	2-4 spots are recommended per one sq yd (9 sq ft) of treatment area.
Each spot should be equal 0.25 to 0.50 grams of product. E.g. 1/8” in thickness and 2 inches in length.	
BAIT STATION APPLICATION: Up to 5 grams of product per station.
