*Generated from trimethylamine HCL 1.00%

Includes Fly Attractant for use in Starbar[®] Fly Terminator[®] Pro Fly Trap and other gallon-size reusable fly traps.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Bait and use trap outdoors.
2. Remove the top of the trap. (Diagram A)
3. Do not open the pod, it will dissolve in water. Add one-half gallon of clean water to fill line to activate the attractant. (Diagram B)
4. Securely replace top of trap. (Diagram C)
5. Agitate lightly to disperse attractant. (Diagram D)
6. Be sure center baffle assembly is snapped into the open position. Hang trap outside from handle or tab on top of jug or place trap on ground in a sunlit area of high fly concentration when flies are active and where odors will not be a problem. (Diagram E) For best results, place trap within four feet of the ground. In hot weather (above 90°F/32°C), place trap in shade for better results, in cooler weather, place trap in sun.
7. Agitate trap contents occasionally to thoroughly wet trapped flies. Add water to the trap as necessary to maintain the fluid level. Rebait trap when full of flies, or when trap contents dry out.
8. Wash hands with soap and water after handling.
9. Trap may be rinsed and refilled with replacement Starbar[®] Fly Trap Attractant.

Manufactured for: **Central Garden & Pet**, 1501 East Woodfield Road, 200W, Schaumburg, Illinois 60173
