Trimethylamine*	0.6%
Indole.....	0.2%

OTHER INGREDIENTS: 77.7%

TOTAL: 100.0%

*Generated from trimethylamine HCL 1.00%

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Bait and use trap outdoors.
2. Remove trapping heads from packaging and open the bag containing the fly attractant pods. (Diagram A)
3. Rinse out a standard one-gallon plastic milk/water/juice jug. Use only transparent type jugs, not opaque or colored jugs.
4. Place two water-soluble attractant pods into empty jug trap. Do not open the pods, they will dissolve in water. Add one-half gallon of clean water to activate the attractant. (Diagram B)
5. Slide cylinder part of trap head into mouth of jug. (Diagram C)
6. Agitate lightly to disperse attractant. (Diagram D)
7. Hang trap outside from handle or place trap on ground in a sunlit area of high fly concentration when flies are active and where odors will not be a problem. (Diagram E) For best results, place trap within four feet of the ground. In hot weather (above 90°F/32°C), place trap in shade for better results. In cooler weather, place trap in sun.
8. Agitate trap contents occasionally to thoroughly wet trapped flies. Add water to the trap as necessary to maintain the fluid level. Rebait trap when full of flies, or when trap contents dry out.
9. Wash hands with soap and water after handling.
10. Trap may be rinsed and refilled with replacement Starbar® Fly Trap Attractant water-soluble pods.

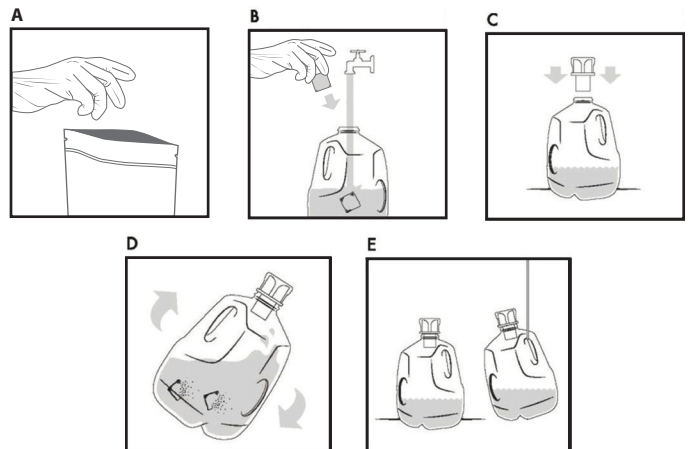

KEEP OUT OF REACH OF CHILDREN CAUTION

See Additional Precautionary Statements.

EPA Reg.No. 89459-11

EPA Est. No. 270-IA-001

NOTE: Not for indoor use, nor for use against biting flies. Contents may give off bad odor; keep contents from coming in contact with hands or clothing.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry, well-ventilated location out of reach of pets and livestock.

DISPOSAL: Deposit outer packet in trash.

For information or in case of emergency, call 1-800-347-8272.
