

A NEW REASON TO ROTATE ALL SEASON WITH DURASTRIKE™ FLY SCATTER BAIT

Proper rotation is essential in fighting against fly bait resistance — allowing for even greater fly control on any operation. QuikStrike® Fly Scatter Bait, Golden Malrin® Fly Bait, Cyanarox® Insecticidal Bait, and the new DuraStrike™ Fly Scatter Bait from Starbar® Products all use different active ingredients, modes of action, and attractants that will reinforce the fight against resistance and boost profits.

YOUR FLY BAIT ROTATION JUST GOT STRONGER

Starbar® DuraStrike™ Fly Scatter Bait is a ready-to-use granular bait for use in and around residential, commercial, and agricultural structures to control house and fruit flies and kill blow flies indoors.

DuraStrike™ Fly Scatter Bait can be used in conjunction with QuikStrike® Fly Scatter Bait, Golden Malrin® Fly Bait, and Cyanarox® Insecticidal Bait as an alternative or additional rotational product. With four fly baits that have different active ingredients, modes of action, and attractants, there is no reason to go anywhere else for your fly control needs. DuraStrike™ Fly Scatter Bait can also be used in refillable bait stations or as a scatter bait.

Use DuraStrike™ Fly Scatter Bait to control flies, including house flies and lesser house flies.

FEATURES:

- The active ingredient Indoxacarb
- Convenient 1 lb. can and 28 lb. bucket

BENEFITS:

- Controls house and fruit flies in and around residential, commercial, institutional, and agricultural structures
- Kills blow flies indoors
- Provides an alternative mode of action for insecticide resistance management
- Can be used as part of an integrated pest management program

APPROVED FOR:

- Dairies
- Broiler Houses
- Poultry Houses
- Kennels
- Canneries
- Food Processing Plants
- Beverage Processing Plants
- Refuse Dumpsters
- Stables
- Swine Facilities
- Feedlots

APPLICATION METHODS:

SCATTER BAIT - DO NOT apply as a scatter bait in areas accessible to children, pets, or livestock. When bait stations are used, **DO NOT** place within reach of children, pets, or livestock.

May be used around the outside of dairies, broiler houses, kennels, canneries, beverage processing plants, meat and poultry processing plants, food processing plants, and refuse dumpsters associated with these establishments and the walkways of poultry houses. May also be used in and around the outside of restaurants, supermarkets, and bakeries.

BAIT STATION - DO NOT apply as a scatter bait indoors in residential structures, commercial establishments, food- and feed-handling establishments, food-processing plants, and restaurants. Bait stations must be used when applying inside these buildings/structures, excluding use on walkways within animal-production facilities.

May be used in house fly infested areas such as: in and around dairies and broiler houses, poultry houses, canneries, beverage processing plants, food processing plants, kennels, stables, refuse dumpsters, warehouses, loafing sheds, swine facilities, broiler houses, and feedlots. May also be used in and outside the non-food/feed areas of restaurants, barns, taverns, supermarkets, and bakeries.
