

# ADD TO MILK. STOP THE FLIES BEFORE THEY START.

**CLARIFLY® ADD-PACK**

For use with whole milk or milk replacer

## STOP FLIES BEFORE THEY START

Add ClariFly® Add-Pack daily to whole milk or milk replacer. This larvicide passes through calves to their manure, where it helps prevent flies from developing in treated manure — protecting your calves and your operation.

Use ClariFly® Add-Pack in whole milk or milk replacer as part of an Integrated Pest Management (IPM) program to help reduce fly populations in calf environments.

## FEATURES AND BENEFITS:

- Helps reduce house flies, face flies, stable flies, and horn flies in manure from treated calves, including veal calves
- Supports healthier, more productive calves
- Enhances calf comfort and your work environment
- Part of an effective IPM program

## WHY CLARIFLY® ADD-PACK?

- Interrupts the fly's life cycle rather than through direct toxicity
- Works with whole milk or milk replacer
- Active ingredient (diflubenzuron) is EPA-designated low risk to humans and non-target organisms

Avg. Calf Wt. (LBS.)	AMOUNT OF CLARIFLY® 0.16% ADD-PACK DAILY FOR: <i>Measured in tsp, TBS and Cups</i>					
	5 Calves	10 Calves	20 Calves	40 Calves	80 Calves	100 Calves
75	1 TBS	2 TBS	¼ C	½ C	1 C	1 ¼ C
100	4 tsp	8 tsp	⅓ C	⅔ C	1 ⅓ C	1 ⅔ C
150	2 TBS	¼ C	½ C	1 C	2 C	2 ½ C
200	8 tsp	⅓ C	⅔ C	1 ⅓ C	2 ⅔ C	3 ⅓ C

Avg. Calf Wt. (LBS.)	AMOUNT OF CLARIFLY® 0.16% ADD-PACK DAILY FOR: <i>Measured in Dry Ounces, by Weight in Ounces</i>					
	5 Calves	10 Calves	20 Calves	40 Calves	80 Calves	100 Calves

150	21.3	42.5	85.0	170.1	340.2	425.2
200	28.3	56.7	113.4	226.8	453.6	567.0

## HOW TO USE:

The dosage of ClariFly® Add-Pack is proportional to the animal's body weight. Each animal must receive 0.1 oz (0.00625 lb) of this product per 100 lbs of body weight daily, which equates to 0.1 mg diflubenzuron/kg of body weight per day. Prepare fresh daily to provide the labeled daily intake of 0.1 mg diflubenzuron/kg of body weight per day.

Start ClariFly® Add-Pack early in the spring, ideally 30 days before flies begin to appear. Continue ClariFly® Add-Pack in the calves' whole milk or milk replacer throughout the summer and into the fall until cold weather restricts fly activity.
