

IRRITATED LIVESTOCK

Fire ants can cause injury and reduced weight gains.

EXTINGUISH® PLUS FIRE ANT BAIT CAN BE USED WITH CONFIDENCE FOR QUICK REDUCTION OF FIRE ANT MOUNDS.

PROTECT YOUR FARM.

Take fire ants out before they take a bite out of your investment.

Extinguish® Plus Fire Ant Bait is a fast acting, long-lasting solution to fire ant infestations. Approved for use on rangeland and pasture, Extinguish® Plus goes after fire ants with the one-two punch of an adulticide and an IGR to help ensure they don't come back.

FIRE ANT CONTROL FOR YOUR PASTURE AND RANGELAND.

A DEFENSE AGAINST THE MOUNDS.

Extinguish
PLUS

COMPANION ANIMALS

Fire ants can inflict irritating bites.

FINANCIAL IMPACT

Fire ants can damage your property.

NASTY STING

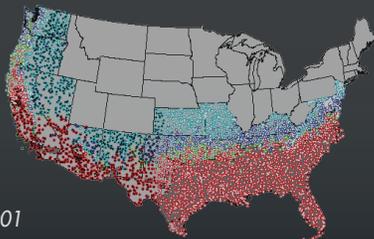

Fire ants can harm you, your children and your livestock.

MEET FIRE ANTS HEAD-ON WITH EXTINGUISH® PLUS FIRE ANT BAIT.

The dual action of a fast acting adulticide and a long lasting insect growth regulator (IGR) in Extinguish® Plus kills worker ants and sterilizes the queen. The result is a one-two punch for fire ants, quick reduction of mounds and the confidence that the ants will be completely extinguished through the IGR.

Fire Ant Range Expansion*

Grass Forage

Extinguish® Plus may be applied to grass forage (pastures and rangeland) for the control of fire ants. See Outdoor Use table on container label for application directions.

General Application

Approved for indoor or outdoor use, including but not limited to pastures, rangeland, lawns, landscaped areas, as well as on grounds surrounding poultry houses (excluding runs and ranges), corrals, and other animal holding areas.

Application Tips

Apply when ants are active and foraging. Place a potato chip near the mound and observe if ants begin feeding. Do not apply product if ants do not feed within a few minutes. Apply product when feeding occurs on the potato chip. Repeat application as needed.

Do not apply product within 6 hours of a rain event. Apply product when area is dry from dew or irrigation. Do not irrigate for 24 hours after application. The bait will become unattractive to ants if it becomes wet.

Methods of Application

Motorized spreaders, aerial, backpack, bait station, or hand.
