

ON ANIMAL

AROUND OPERATIONS

Sprays for Use In, On and Around Your Operation

Starbar® sprays are used **in, on and around** your operation. With a wide variety of solutions, these products help to fight a wide variety of insects. There are solutions for insects in buildings, flies on livestock, and mosquitoes around standing water.

Each spray is formulated to address the specific behavior of insects at this level. That's targeted insect control based on science.

Application Sites

Starbar® sprays can be applied to various places in, on and around your operation. Application sites include in pastures and yards, in standing water, on animals, on crops, and in buildings. Read the individual product labels for specific application directions.

Insect Control Starts with Starbar

Insects on your operation are a nuisance to you and your employees, but they also pose a threat to your animals and property, causing significant economic losses. That's why it is so important to set the bar for insect control using Starbar® products.

Homes, small farms and commercial operations have trusted Starbar® products to control insects for more than 40 years. As an industry leader, Starbar has a mission to provide effective pest control solutions.

With Starbar® products, you'll be equipped to set the bar at every level.

With Starbar® sprays, you can set the bar for insect control **in, on and around** your operation. You can count on the precise formulations used to provide effective control.

For more information on setting the bar for insect control at all levels of your operation, visit StarbarProducts.com or contact a Central Life Sciences representative at 1-800-347-8272.

Starbar® Sprays

Set the Bar for Insect Control In, On and Around Your Operation

IN, ON AND AROUND

Cattle Armor™ 1% Synergized Pour-On

Cattle Armor™ 1% Synergized Pour-On can be used as a pour-on, mist spray or in a backrubber for livestock insect control. Its synergized formulation controls lice and flies on beef cattle, lactating and non-lactating dairy cattle, calves and sheep.

Prod. #	Prod. Desc.	Case Qty.
100209003	1 gal. bottle	4
100209004	55 gal. drum	1

Prolate/Lintox-HD™ Insecticidal Spray & Backrubber for Livestock

Diluted and used as a spray or in a backrubber, the powerful active ingredient in Prolate/Lintox-HD™ Insecticidal Spray & Backrubber kills a variety of insects on contact. It can be used for treatment of horn flies on non-lactating cattle or for lice and sarcoptic mange mites on swine. It also kills ticks.

100209011	1.25 gal. bottle	4

Exhalt™ WDG Insect Growth Regulator

A product that may be applied as a granular larvicide or dispersed into water and applied as a liquid spray. The active ingredient is novaluron, which affects developing immature stages of listed insects and prevents molting to adult forms.

Prod. #	Prod. Desc.	Case Qty.
100542698	14 oz.	12
100542699	5 lb. bottle	4

Lambda 9.7 CS

Lambda 9.7 CS is an adulticide labeled for control of a variety of insects in a wide range of application sites. Advanced protection technology prevents the active ingredient from breakdown in heat and UV exposure resulting in greater residual control and reduced retreatments.

Prod. #	Prod. Desc.	Case Qty.
100208957	1 qt. bottle	6

PBO-8® Synergist

A synergist for many classes of insecticide, PBO-8® Synergist improves efficacy, allowing lower use rates and preventing resistance. It works by blocking the production of mixed-function oxidase enzymes, which insects use to metabolize an insecticide's active ingredients.
